

# AI Profit Playbook

MAKE YOUR FIRST \$1K WITH AI THIS WEEK

## Introduction

A year ago, I was out in the Texas heat — \$23 an hour, covered in dust, wondering if I'd missed my shot. Then I found AI and for the first time, it felt like the timing was *finally* right. AI isn't coming — it's already here. It's replacing people who ignore it and rewarding the ones who learn it. For me, it was overwhelming and confusing because I had zero tech background, but I got up at 5am every day to learn AI tools before going to my 9-5 and I want to share what I learned with you.

The truth? **You haven't missed your chance.** Not even close. The next few years will make a whole new wave of self-made millionaires — the ones who start *now*.

The **AI Profit Playbook** is your shortcut.

You're not late. You're right on time. Let's ride this wave together.

## Your Story

I didn't come from tech.

No degree. No startup. Just \$23 an hour, a tool belt, and a dream of something bigger.

AI changed everything. What started as curiosity turned into leverage — a way to turn my work ethic into systems that earn while I sleep.

You don't need to be a genius to win with AI. You just need to start before everyone else figures that out.

That's why I built the **AI Profit Playbook** — the exact roadmap I wish I had when I was still swinging a hammer in the Texas heat.

## The Problem

Most people will miss this AI wave — not because they're lazy, but because they're lost.

There's too much noise.

Too many tools.

Too many "AI gurus" selling hacks that don't actually build income.

They get stuck scrolling instead of building. Testing random prompts instead of following a system. And by the time they figure it out, someone else has already launched the same idea — better, faster, automated.

Here's the truth: AI isn't complicated. But without a plan, it's chaos.

That's why the **AI Profit Playbook** exists — to cut through the noise, show you exactly what works, and help you *actually make money* with AI before the window closes.

## 30-Day Roadmap

Here's a practical plan for integrating AI into any business you have OR build it so that AI is the business. Use this 30-day plan to automate 95% of the work so you can focus on the things you really care about.

### ***From \$0 → \$1K with AI***

#### **WEEK 1 — Build Your Foundation**

**Learn the tools.**

**Set up ChatGPT, Canva, and Beehiiv.**

**Pick one skill you can turn into an offer (copy, design, automation, or content).**

**Small goal: use AI to save yourself 1 hour of work this week.**

#### **WEEK 2 — Create Your First Offer**

**Turn that skill into something people will pay for.**

**Build a simple portfolio post or one-page site with examples.**

**Use AI to write the copy and design it.**

**Small goal: send your offer to 5 real people or businesses.**

#### **WEEK 3 — Automate & Repeat**

**Use AI to handle the boring parts — writing, posting, follow-ups.**

**Start documenting your process (you'll reuse it later).**

**Small goal: earn your first \$100 using AI.**

#### **WEEK 4 — Scale It Up**

**Double down on what worked.**

**Automate delivery.**

**Add another offer or turn your workflow into a system you can sell.**

**Small goal: hit your first \$1K month — and prove this works.**
